

# Now Stocking Metric Hot Dip Galvanized Structural Bolts (Plain Finish Upon Request)

- Perfect for high stress situations that need strong corrosion resistance.
- Class 10.9 steel – not typically hot dip galvanized due to hydrogen embrittlement, but structural bolts are tested and treated to provide 10.9 strength with hot dip galvanized corrosion resistance.
- Most sizes available from stock, but even more sizes are available quickly from our European suppliers.
- Vendors keep MTRs on file for all structural items.

## EN 14399-4 replaces DIN 6914

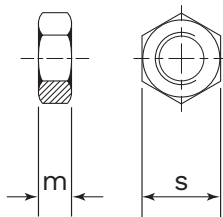

Hexagon bolts with large head for high-strength structural bolting, system HV.

Dimensions	M12	M14	M20	M22	M24	M27	M30	M36	M42*
<b>k</b>	8	10	13	14	15	17	19	23	26
<b>s</b>	22	27	32	36	41	46	50	60	70
<b>b</b>	23	28	33	34	39	41	44	52	74

## EN 14399-4 replaces DIN 6915

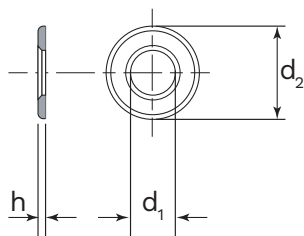

Hexagon nuts for high-strength structural bolting, system HV.

Dimensions	M12	M14	M20	M22	M24	M27	M30	M36	M42*
<b>m</b>	8	10	13	14	15	17	19	23	26
<b>s</b>	22	27	32	36	41	46	50	60	70

## EN 14399-6 replaces DIN 6916

Plain chamfered washers for high-strength structural bolting, system HV.

Dimensions	M12	M14	M20	M22	M24	M27	M30	M36	M42*
<b>d<sub>1 min</sub></b>	13	17	21	23	25	28	31	37	43.4
